Introducing...

**BACTEC™ MYCO/F LYTIC Medium**

For the recovery of yeast, fungi and mycobacteria from blood and sterile body fluids* without pre-processing.

- Increases performance
- Reduces exposure hazard
- Reduces labor
- Reduces cost

A new medium which can be used with the BACTEC 9240/9120/9050 Blood Culture Systems or the BACTEC 9000MB Mycobacteria Culture System.

MYCO/F LYTIC medium is the latest result of the Becton Dickinson ongoing commitment to developing the most effective and cost-efficient media for septicemia and mycobacteria testing.
Reduced Cost

BACTEC MYCO/F LYTIC medium eliminates the need for tubes, accessories and reagents and reduces labor.

*FDA cleared for recovery of yeast and fungi from sterile body fluids using the BACTEC 9240/9120/9050 and 9000MB automated blood culture and mycobacteria systems — offering continuous monitoring for fast results, plus the safety of a truly non-invasive system and no specimen pre-processing.

Increased Efficiency, Safety and Reduced Labor

Simplifies ordering and inventory management by providing a medium for the detection of three organism types.
